Part III DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claim 54 and 58, drawn to an apparatus and method of delivering a stent, classified in Class 606, subclass 194.

Group II. Claims 55, 56 and 59, drawn to a stent and method of using a stent, classified in Class 623, subclass 1.

Group III. Claim 57, drawn to a method of making a stent, classified in Class 623, subclass 901.

Group IV. Claims 60 and 61, drawn to a stent joining means, classified in Class 600, subclass 36.

The inventions are distinct, each from the other because of the following reasons:

2. The inventions are disclosed as different combinations which are not connected in design, operation or effect. These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in
